

Pet Insurance Cost Comparison Checklist

Use the same settings on every quote before choosing the lowest price.

1. Match the quote settings

- ☐ Same pet profile: species, breed, age, sex, ZIP code, and spay/neuter status.
- ☐ Same plan type: accident-only, accident and illness, or wellness add-on.
- ☐ Same annual deductible, reimbursement rate, and annual limit.
- ☐ Same optional add-ons, especially exam fees, dental illness, wellness, and behavioral coverage.

2. Check the exclusions before price

- ☐ Pre-existing condition definition and lookback period.
- ☐ Waiting periods for accidents, illnesses, orthopedic issues, cruciate ligament injuries, and dental disease.
- ☐ Breed-specific, hereditary, congenital, bilateral, or chronic-condition limits.
- ☐ Whether emergency exam fees, specialists, diagnostics, prescriptions, and hospitalization are reimbursed.

3. Provider comparison table

Provider	Monthly	Deductible	Reimb.	Limit	Notes	

Decision rule

A cheaper policy is not automatically better. Choose the quote that keeps a large emergency affordable after deductible, coinsurance, annual limit, and exclusions.
